For Our Customers:

When reporting services provided for nuclear medicine, procedures must be coded correctly when submitting claims to Medicare and commercial payers. The most common CPT (Current Procedural Terminology) and HCPCS (Healthcare Common Procedure Coding System) codes are listed in this guide for your reference.

Disclaimer: Coding and reimbursement information is provided for educational purposes and does not assure coverage of the specific item or service in any given case. Information provided in this document is for educational purposes only and is not intended to provide le.g.al, patient specific coding or claims submission information. Information is provided based upon the current landscape utilizing the information that is currently available.

Procedure coding should always be based upon medically necessary procedures and supplies provided to the patient. Jubilant Radiopharma and The Pinnacle Health Group make no guarantee of coverage or reimbursement. Contact the local Medicare Administrative Contractor (MAC) or CMS for specific information as payment rates listed are subject to change. To the extent that you submit cost information to Medicare, Medicaid or any other reimbursement program to support claims for services or items, you are obligated to accurately report the actual price paid for such items, including any subsequent adjustments. Current Procedural Terminology numeric codes, descriptions, and modifiers are trademarks and copyrights of the AMA.

Guidelines for Nuclear Medicine Studies and Radiopharmaceuticals

Coding

General Billing and Coding guidelines require the provider to report radiopharmaceuticals, regardless of whether the items are paid separately or packaged, using the appropriate HCPCS code. The appropriate units of service, as per the HCPCS code description, must also be provided. The HCPCS code for the radiopharmaceutical must appear on the same claim as the study. The claim must indicate the actual date the service was provided. Therefore, if the study is performed on a different date of service from the radiopharmaceutical the claim may contain more than one date of service.

CMS Payment for Radiopharmaceuticals in the Physician Office

CMS categorizes radiopharmaceuticals into two groups for payment purposes: diagnostic and therapeutic. Diagnostic radiopharmaceuticals function as products that enable the provision of an independent service, specifically, a diagnostic nuclear medicine scan. Conversely, therapeutic radiopharmaceuticals are themselves the primary therapeutic modality. CMS requires claims with payable nuclear medicine procedures to include the radiopharmaceutical. Payment for radiopharmaceuticals is inclusive of the acquisition cost and pharmacy overhead. The pharmacy costs should not be reported separately on the claim.

In the physician office all radiopharmaceuticals are contractor priced. This means that each Medicare Administrative Contractor (MAC) will determine pricing for each Radiopharmaceutical HCPCS code. Some MACs may establish fee schedule pricing for some or all radiopharmaceuticals, while others may require cost information to be submitted on all claims containing a radiopharmaceutical. In this case, the MAC will utilize this information to establish appropriate reimbursement. Providers should check with their local MAC to determine if a payment rate has been assigned and/or if there any invoice/cost reporting requirements.

Use of the JW and JZ Modifier

Effective January 1, 2017, providers and suppliers are required to report the JW modifier on all claims that bill for drugs and biologicals paid <u>separately</u> under Medicare Part B, with unused and discarded amounts from single-dose containers or single-use packages. Also, providers and suppliers must document the amount of discarded drugs in Medicare beneficiaries' medical records. Effective July 1, 2023, providers and suppliers are required to report the JZ modifier on all claims that bill for drugs from single-dose containers that are separately payable under Medicare Part B when there are no discarded amounts. The JW and JZ modifier requirement applies to all separately payable drugs from single-dose containers assigned status indicators "G" (Pass-Through Drugs and Biologicals) or "K" (NonpassThrough Drugs and Nonimplantable Biologicals, <u>Including Therapeutic Radiopharmaceuticals</u>) under the OPPS for which there is a discarded amount.
